PARIS, 14.10.2021, 15:25 Time

USPA NEWS - Gastronomy is the study of the relationship between food and culture, the art of preparing and serving rich or delicate and appetizing food, the cooking styles of particular regions, and the science of good eating. One who is well versed in gastronomy is called a gastronome, while a gastronomist is one who unites theory and practice in the study of gastronomy.... The gastronomic meal, such as it has been practiced in France for centuries, is obviously an occasion for eating and drinking well. But it is also a social event, one which structures French life and society, sharing more than just nourishment for the body.

A special alchemy takes place during a gastronomic meal in France; it cannot be fully appreciated unless it is enjoyed in good company. These guests form a table companionship. And, by extension, the French have a strongly held belief that a festive meal is not complete unless shared with others.... When people hear the words culinary, cooking, or food, they typically associate it with classic French cuisine. Most of the time people relate and associate food with what has been done in the past, sticking to traditional ways.
